Jaya Fulzele

Software Developer — Frontend Developer — MERN Stack Developer

+91-9604213200 — jayshrifulzele71@gmail.com — linkedin.com/in/jayshrifulzele

Professional Summary

Computer Science Engineering graduate skilled in React.js, JavaScript, Node.js and Python with hands-on experience building responsive full-stack web applications. Developed AI-powered projects using Firebase, Clerk Authentication and Google Places API. Seeking an entry-level Software Developer or Frontend Developer role.

Technical Skills

Languages: Python, JavaScript

Frontend: HTML5, CSS3, React.js, Tailwind CSS **Backend:** Node.js, Express.js

Database: MongoDB, Firebase, MySQL **Tools:** Git, GitHub, VS Code, Postman

Technologies: REST APIs, Clerk Authentication, Google Places API, Responsive Design, Prompt Engineering, Generative AI

Experience

Data Analyst Intern **Jan 2025 – Jul 2025**

Bootcoding, Nagpur

- Cleaned, processed and analyzed datasets using Python.
- Performed data preprocessing and exploratory data analysis on real-world datasets.
- Improved analytical and problem-solving skills through real-world datasets.

Projects

AI Trip Planner *React.js — Tailwind CSS — JavaScript — Node.js — Firebase — Clerk Authentication — Google Places API*

- Developed an AI-powered travel planning application that generates personalized travel itineraries.
- Integrated Firebase, Clerk Authentication and Google Places API to provide personalized trip recommendations and user management.
- Built a responsive and user-friendly interface using React.js and Tailwind CSS to enhance the overall user experience.

Food Delivery Website *React.js — Tailwind CSS — JavaScript — React Router*

- Developed a responsive food ordering application featuring user authentication, shopping cart, GST calculation and order confirmation interface.
- Designed reusable React components and implemented category-based menu browsing for an improved user experience.
- Built a responsive user interface using React.js, Tailwind CSS and React Router.

Admin Portal Dashboard for AI Mock Interview *HTML — CSS — Python*

- Designed and developed an admin dashboard to manage interview schedules, users, and candidate information.
- Built responsive web pages and implemented backend functionality using Python.
- Improved administrative workflow through an organized dashboard interface.

Assistive Eyes for Blind (Voice-Based Email System) *Python — Speech Recognition — Text-to-Speech*

- Developed a voice-controlled email system to help visually impaired users send, read and manage emails using voice commands.
- Integrated Speech Recognition and Text-to-Speech technologies to provide a completely hands-free experience.
- Improved accessibility by eliminating the need for keyboard and mouse interactions.

Certifications

- **Python & MERN Stack Development** SEED Infotech, Nagpur (2026)
- **Introduction to Artificial Intelligence (AI)** Coursera (2026)
- **Start Writing Prompts Like a Pro** Coursera (2026)

Education

Bachelor of Technology (Computer Science Engineering) 2021 – 2025

Priyadarshini Bhagwati College of Engineering (PBCOE), Nagpur
